Question No.16 Writing Short Composition in 200 words

12

পরীক্ষায় ২০০ শব্দের মধ্যে একটি Short Composition লিখতে হবে। Composition-গুলো যেকোনো বিষয়বস্তুর ওপর হতে পারে। Short Composition লেখার ক্ষেত্রে Introduction, Body ও Conclusion-এ তিনটি Part থাকা বাঞ্ছনীয়। এ অংশে নম্বর থাকবে ১২।

1. Write a short composition on "A Train Journey You Have Recently Experienced" in about 200 words. [Junior Scholarship Exam-2025]

Ans. A Train Journey You Have Recently Experienced

A journey is always a source of pleasure to all. A journey by train is especially pleasant for everyone. It is because a journey by train is safe and comfortable. Last month, I enjoyed a journey by train with my family from Dhaka to Chattogram. We went there to attend the wedding ceremony of my cousin. It was one of the most enjoyable journeys in my life.

On the fixed day, we left home early in the morning and went to Kamalapur Railway Station. The station was very crowded and noisy. We bought tickets and got into the train. I managed my seat beside the window. Suddenly, the train blew its whistle and I jumped. Then, the train started.

At first, the train moved slowly. Then, it moved in full speed towards Chattogram. It seemed to me that the trees, houses, people and stations all went quickly back to Dhaka. I wanted to put my head out of the train window, but my parents didn't let me. I looked through the window and saw the beautiful sights. The paddy fields and other trees were very beautiful to look at. Suddenly, the train rushed forward crossing a bridge. I saw some sailing boats in the river. I saw the farmers working in the fields and some children playing cricket. All these gave me new and exciting experiences.

Our compartment was crowded. There was no vacant seat. Some of the passengers were talking on various topics. Some were reading newspapers or magazines. Some were sleeping. Our train touched at a few big and small stations. When we were in Chattogram, we saw many hills.

Eventually, we reached the destination safe and sound at 4 pm. Through this journey by train, I got much enjoyment. I wish I could make it again and again.

2. Write a short composition on "A Dream Place That You Want to Visit" in 200 words.

Ans. A Dream Place That I Want to Visit

Everyone has a dream place that he or she wants to visit. I also have a dream place. The name of my dream place is Disney World. It is a famous amusement park located in the United States. It is known all over the world for fun, magic, and happiness. I have seen Disney World in movies, cartoons, and pictures. That is why, I really want to visit it one day.

Disney World is a place full of joy and imagination. There are many beautiful castles, colorful lights, and

exciting rides. I want to see the famous Cinderella Castle and take pictures in front of it. I also want to meet my favorite cartoon characters like Mickey Mouse, Donald Duck, and Elsa. I think it will feel like a fairy tale come true.

There are many fun activities in Disney World. People can enjoy roller coasters, water rides, and magic shows. There are also parades and fireworks at night, which look very beautiful. I want to watch those shows with my family and enjoy every moment.

Disney World is not only for children but also for adults. It helps people forget their worries and feel happy again. Visiting this place will give me sweet memories for life.

Disney World is truly my dream place. I hope that one day my dream will come true, and I will visit this magical place.

3. Write a short composition on 'Measles'.

Ans. Measles

Measles is a highly contagious viral disease that mainly affects children and spreads very quickly. It is caused by the measles virus and can have serious effects on the human body. Because of its fast spread, measles is still considered a major public health problem in many countries, including Bangladesh.

Measles spreads from person to person through air droplets. When an infected person coughs, sneezes, or talks, tiny droplets carrying the virus spread into the air and infect others nearby. It can also spread through close contact or by touching contaminated surfaces and then touching the nose, mouth, or eyes. The virus can remain active in the air or on surfaces for up to two hours, increasing the risk of infection in crowded places like schools and public areas.

The symptoms of measles usually begin with a high fever, cough, runny nose, sore throat, and red eyes. After a few days, red rashes appear on the face and spread over the whole body. Mild cases can be treated at home with rest, fluids, soft food, and doctor-advised medicines. Severe cases may cause pneumonia, diarrhea, brain infection, blindness, or even death. Patients with serious symptoms must be taken to the hospital immediately.

In Bangladesh, a serious measles outbreak in 2026 affected many districts, especially children under five. Thousands of cases and several deaths were reported. The main reason behind the outbreak is missed vaccination and immunity gaps.

Vaccination is the best protection against measles. With awareness, timely vaccination, and proper healthcare, this disease can be controlled and prevented effectively.

4. Write a short composition on "Your First Day at School".

Ans. **My First Day at School**

**Or, The Most Memorable Day of My Life
Or, A Memorable Event in My Life**

It is almost ten years since I went with my father to take admission into my village school. I was then in my 6th year. From that tender age, I began my schooling. Now I am a student of class eight. But I can still clearly remember that interesting incident of my first day at school.

I was a bit late to join my school. The other students of my age in my locality took admission earlier than me. For this I became almost crazy to join the school. Only two days back before I took my admission, my parents declared the news of my schooling. Hearing this, I became very much excited. I started leaping and laughing in great joy. I at once went out and told this exciting news to whoever I met on my way. I immediately met all the children of my age and gave them this happy news.

But when the day of my schooling came, I became quite restless. I went to every member of my family and received their blessings. They all wished me a successful life.

Then I reached my school with my father. I at once joined my classmates and started shouting and running around the school premises in joy and excitement. I thought that I was in the school only to enjoy myself with my classmates.

Suddenly the bell for class rang and I entered the first class of my school life. When our class teacher called out my name, I became so excited that I could not understand what I should do. My teacher stared at me for a while and asked me what my father's name was. I answered and after that he introduced me to the whole class.

Then two more classes were held. After this, the school broke up. We, some newcomers, made friends. We wandered around the school and played in the school field. All these things gave me much joy and thrill.

This was my first day at school and it was a very interesting day/event in my life. Till today I cannot forget this day/event of my childhood.

5. Write a short composition on "Duties of a Student".

Ans. **Duties of a Student**

Student life is the most valuable period in a man's life. This is the time when the seeds of future life are sown. For this, it is called the sowing season in our life. During this period, a student has to do certain things to be successful and happy in his future life.

The main duty of a student is to study and acquire knowledge on various things. He must study according to a routine. He has to be attentive to his studies and teachers. He should also read newspapers, magazines, literature, history, etc.

A student should remember that character is the crown of a man. So, he has to cultivate good manners and other noble virtues. All moral qualities like honesty, modesty, truthfulness, discipline,

perseverance, sincerity, punctuality must be acquired during this time.

A student must obey and honour his parents. When they are sick, helpless or old, he must serve them. He should also be obedient to his teachers and other superiors.

A student must not waste his time and energy. So, he must possess a sound health by having balanced diet, taking regular physical exercise, taking part in games and sports. Moreover, he must always avoid evil company.

In case of national emergencies, like floods, tornadoes, storms, etc. he must not sit idle. He must extend his helping hands during these times.

To attain success in future, a student must do his duties accordingly. Otherwise, it will bring him utter failure, untold sorrows, miseries and repentance.

6. Write a short composition on "Students and Social Services".

Ans. **Students and Social Services**

Students are the future leaders and makers of a nation. The most important duty of students is to study seriously with devotion. But, they are also social beings like other classes of people. So, as members of society, they have certain duties to the society in which they live in. There are many kinds of social services and students have a lot to do in these sectors.

Living in a developing country like ours, students must render some social services for the development and welfare of the nation. So, during the long vacation and leisure time, students can open night schools and teach the illiterate children and adult people. They can also teach the farmers about the modern methods of cultivation, the use of fertilizers and proper harvest. They can also suggest them to dig a pond for fish cultivation or to make a farm.

Students can render immense service in the field of health. The village people and the people living in the slums have no knowledge about health, nutrition and sanitation. The students can teach them about the basic rules of health, nutrition and sanitation.

Students can prove to be worthy during the natural disasters. In times of flood, famine and cyclone, earthquake and epidemic, they can come forward to help the affected people. They can raise fund to distribute relief to the affected people. During the epidemics, medical students can serve the sick with food, clothes and medicine.

Students are a great source of strength to the country. They have ideals, energy and power to work. If they are rightly guided, they can really render very valuable service to the society.

7. Write a short composition on "Your Aim in Life".

Ans. **My Aim in Life**

Or, My Future Plan of Life

Everybody should have an aim in life. An aimless life is like a boat without a rudder that can never reach its destination. So, to succeed in life one should have a future plan from one's childhood. It can be said that one's aim is one's future plan for his life.

Different people may have different aims in life. Some want to be a business icon, some want to be a politician. Again, there are some people who like to

do something noble being a doctor, an engineer etc. Like others, I also have an aim in life. I have decided to be a teacher. A teacher can lead the nation to the highest stage of prosperity if he can properly teach the students with his ideal.

I want to serve the nation through proper teaching. Illiteracy is the vital cause of our poverty. If our students are properly educated, they can alleviate our poverty. By being a teacher, I am determined to serve the nation.

In order to fulfil my future plan, I must acquire some degrees. After passing my SSC and HSC Examination, I will get myself admitted into a university for higher education. After my Honour's and Master's degrees, I shall take a training on teaching. Then, I shall join a school or college. I would like to choose a rural area as my working place. I will teach my students very sincerely. I will teach them not only academic education but moral education also. I will make them good citizens of the state.

I think I have selected the right aim. I know the path may not be smooth. Yet, I am determined. I hope I could reach my goal and do something noble for my nation.

8. Write a short composition on "Your Favourite Hobby". □

Ans. My Favourite Hobby

Hobby means one's favourite occupation. It is usually done during leisure. It doesn't give one money, but gives much pleasure. Every man has his own favourite hobby.

There are many kinds of hobbies like singing, painting, reading, stamp collecting, coin collecting, angling, gardening and so on. My hobby is gardening.

I love flowers very much. So, I have made a flower garden. It is in front of our house. I have planted the seedlings of roses, jasmynes, jabs, sun-flowers and many other seasonal flowers. Every morning I water the plants, loose the soil and take care of the plants. In the evening, I water them again. On holidays, I pass some time there. I have put a bamboo-made fence around my garden.

My hobby keeps me cheerful. When I am bored with my studies or other works, I go to my garden. The pleasant sight of my garden and the sweet scent of the flowers remove my boredom. It is a great source of joy and recreation for me.

This hobby is very beneficial to me. Before I made this garden, I was a sickly boy. I had lost my appetite and became very weak. But when I started this garden and worked in it, my health improved. Besides this, I grow vegetables in a corner of the garden. It saves a lot of family expenses.

A hobby is necessary in every man's life. But we must not pass much of our time in our hobbies. We must do our main jobs first and then we should pass our leisure time in our hobbies.

9. Write a short composition on "The Game You Like Most".

Ans. The Game I Like Most
[The Game of Football]

Games and sports are helpful for keeping sound health. People enjoy playing both indoor and outdoor games. I often play cricket, football, table tennis, etc. Among them, football is the most

favourite to me. Football is an exciting and enjoyable game. It thrills (রোমাঞ্চিত করে) not only the players but also the spectators. So, it is my most favourite game.

Football is an outdoor game. It is a very exciting game of 90 minutes. There is a break after 45 minutes. The game of football needs a field and two bar posts. Football is a team sport played between two team of eleven players each. The game of football requires a field of about 120 yards long and 80 yards wide and two goal posts at each end. Football is played by kicking the ball with foot. During the game, only the goalkeeper can touch the ball with hands. The players can also head the ball.

The referee with two linesmen conducts (পরিচালনা করা) the game. Everything is supervised by the referee when the game is played. Any of the player who does anything against the rule of football is given penalty (শাস্তি). In this game, the team which scores more goals wins the match.

Football is a game of great interest and enjoyment. It makes the limbs of the body orderly and helps proper blood circulation. It keeps the players fit and active. It also teaches the qualities of leadership. It makes players prompt (তৎপর), cautious, strong and hardy. It teaches us discipline, team spirit and unity. As football is an interesting and exciting game, it makes me cheerful (প্রফুল্ল) when I watch it. I dream to be a professional football player one day.

10. Write a short composition on "The Season You Like Most". □

Ans. The Season I Like Most

There are six seasons in Bangladesh. Spring is one of them. It is the best and the most charming of all the seasons. The Bangla months of Falgun and Chaitra make this season. I like this season most.

Among the seasons, the spring occupies a very high position. To me the winter is very cold, dull and lifeless. In summer, the scorching sun, hot days and nights make life miserable. The heavy rain and frequent floods in the rainy season bring great sufferings for us. The autumn and the late autumn have more or less the disadvantages. But the spring has none of the inconveniences.

With the arrival of the spring, nature puts on a lively look. Everything of nature looks fresh. The sky looks clear and blue, trees put forth new leaves, flowers of charming colour and scent bloom in trees. Bees and butterflies hum and fly from flower to flower. During this season, gentle breeze begins to blow. Sweet twitters of birds are heard. The melodious notes of the cuckoo please our ears.

Everywhere there is joy and mirth. People enjoy a better health. They are happier in this season. Besides, various kinds of vegetables and fruits are also available in this time.

The season lasts for a very short period. During this season, some people suffer from some diseases like diarrhoea, cholera, chicken-pox. Pox is a common disease in this season.

In spite of its few disadvantages, its advantages are more. For all these reasons, I like spring most.

11. Write a short composition on "Tree Plantation".**Ans. Tree Plantation**

Environment plays a vital role to ensure us a sound life. A barren field is not suitable for us at all. On an average, 25% land of a country should have forests. According to various data, our proportion is not satisfactory. In some areas, there are plenty of trees. But in other places, the number of trees is very limited. It is known to us that trees supply us with oxygen which is the most essential thing we need to survive. Besides this, trees supply us with variety of fruits to eat and wood to make furniture. A tired passer-by takes rest in the shade of trees. Birds make their nests on trees.

But our rapid growing population is causing great harm by occupying the land and using trees as fuel. Trees are also helpful to remove erosion of land. Again, where there is less number of trees, we find barren lands without rain. As there are plenty of trees in Sylhet, Chittagong and other hilly areas, rainfall is frequent in these regions.

Nowadays, radio and TV are broadcasting important programmes to make people conscious of the importance of trees. It is true that the herbs from our country are now on extinction. By utilizing various herbs, it is possible to make various medicines. By processing fruit-juice, many delicious foods can be made. We can earn a huge amount of foreign currency by exporting processed food-items.

For the soundness of nature, tree plantation is essential. Visitors also choose the spots with large number of trees for their recreation. For mental refreshment, such places possess a great demand. So, to inspire tree plantation, prize giving may be introduced.

To ensure a healthier and happier life, we should plant more trees than we cut down. So, it is our slogan, "Cut one tree, plant two."

12. Write a short composition on "Science in Everyday Life".**Ans. Science in Everyday Life**

Science is a great blessing for mankind. Nothing better has happened in the history of man than the advent of science in human life. Whether in the home, in the field or in the factory, science has made everything very easy and smooth.

Science has made necessary things available and has brought them within the reach of everybody. Books, music and all other forms of entertainment have been brought to our door. Radio, television, cinema help us in passing our time and also provide education to us.

Science has reduced distance and made travelling a pleasure. Science has won time and space. Trains roar through deserts, jungles and mountains while aeroplanes fly across thousands of kilometres of area. The work of months and years can now be completed in hours.

Science is our most faithful medical attendant. Because of science, we are cured of many diseases. Science has helped in reducing the death rate and has also enhanced the longevity of humans.

Science has provided us with computers and machines which have greatly increased our efficiency. Science has reduced the time of production and increased the amount of production in factories. We can get the news

from every corner of the world through the newspaper, radios and television.

However, in spite of its innumerable benefits, science has some demerits too. Nuclear weapons and other modern lethal weapons have endangered our lives and threaten to destroy the world. However, it is up to us whether we will destroy our world or make us more peaceful and comfortable with the help of science.

13. Write a short composition on "Wonders of Modern Science".**Ans. Wonders of Modern Science**

Science means knowledge gained through experiment and research. Science does many things for the development of human civilization. We are passing our days through the blessings of science. From needles to rockets, everything we get from science.

Our agricultural and industrial development is fully dependent on modern science. Now, we can cultivate our land with power tillers. The production of crops is increasing day by day with the help of chemical fertilizers and insecticides. All the industries run with knowledge and help of science.

We see the influence of science at every step of our life. With the touch of switch, we get our lights dazzling, fans whirling and radios and televisions singing and talking. Telephone, mobile phone, etc. are great wonders of science. We can instantly communicate with our desired person or persons through them. Radio, television, cinema, video recorder, satellite TV etc. are great media for communication and recreation.

Science has done a lot in diagnosing and treating patients. X-ray, CT scan, ultrasonography, ECG, biopsy, various life-saving antibiotics etc. are the wonderful gifts of science.

Science has made the world smaller and faster. Buses, trains, aeroplanes etc. can take us from one place to another within a short time. Computer and internet are the greatest wonders of modern science.

Mobile phones are the latest wonders of modern science. Through them, we can communicate with persons wherever they live. Different functions are installed in them. We can use them for chatting with near and dear ones, taking snaps, watching videos, listening songs, playing games and what not.

The inventions of science are to do good to human beings. Science brings happiness and prosperity. Sometimes, misuses of science brings untold sufferings. So, we must get their good for our welfare.

14. Write a short composition on "Your Childhood Memories".**Ans. My Childhood Memories**

Childhood is the sweetest period of a man's life. Man loves to turn back to his past and feel nostalgic. Whenever I feel very lonely, I remember the memories of my childhood to remove my loneliness and fill my heart with happiness. Then I wish I could be a child again!

The most memories of my childhood are associated with my school days. I was sent to school at six. I can clearly remember the day when my father took me to Mathbari Government Primary School. I used to go to school with my village friends. I was a regular student in my class. So, my teachers were always affectionate to me.

After the school was over, we used to play ha-du-du, hide and seek, gather plums and sometimes used to bath in stream in our way home. I used to flee from school to do those things with my friends. One day, I along with my three friends went to a friend's house to eat green-palm. But as the tree was long none of us dared to climb up it. So, we had to come back with a dissatisfied mind.

In my school, I was a good player. I used to take part in various events. Once I got two prizes in race and long-jump. That day I was very excited and happy.

The holidays were favourite to me. On holidays, I would play with my village friends almost the whole day. Sometimes, I would go to some other village to play with some other friends. I also would visit my nearby relatives on holidays.

How happy I was in my childhood days! The happy and pleasant memories of those days still give me pleasure. If I could go back to those days again!

15. Write a short composition on 'Physical Exercise'.

□□

Ans. Physical Exercise

Physical exercise is one of the factors for improving our health. Hence, physical exercise is necessary for every person. It is more necessary for the students and the officers because they never do any kind of physical labour. Physical exercise means the regular movement of our limbs. It is very essential for maintaining sound health.

There are many kinds of physical exercise. They are of two classes, such as body-building exercise and outdoor games. A body-building exercise can be done inside a room. But the outdoor games can be played only in open field. Some of the outdoor games can be played in a spacious compound. The outdoor games are generally, ha-du-du, hide-and-seek, football, volleyball, badminton, hockey, tennis, cricket and so on. Swimming, running, cycling, horse-riding and long-walking are also very good kinds of physical exercise.

To ensure an active and sound body, there is no alternative to physical exercise. Without it, our body gets inactive. Regular physical exercise keeps our body fit and energetic. We know, "A sound mind lies in a sound body". So, to enjoy a sound life, we must take it daily.

Exercises should be taken considering proper time and place. It should be taken in an open field or in a gymnasium where air can enter easily. Morning is the best period for walking, swimming, jogging, etc. Early rising and walking for some time in open air is very helpful.

Everyone wishes to lead a sound life. Physical exercise is, no doubt, good for our health. Without doing it, we cannot keep ourselves healthy. So, to ensure a sound body and a sound mind, we should take physical exercise regularly.

16. Write a composition about 'The Importance of Reading Newspaper'.

□□

Ans. The Importance of Reading Newspapers

Newspaper plays a vital role in our daily life. It is called the mirror of the world. Sitting in our room, we can know the situation of the world. The news of social, economic, cultural and political situations of a country is published in newspapers. By reading

newspapers, the people of a country can also know the details of other countries of the world. So, newspaper is called the storehouse of knowledge.

Many of us are very fond of reading newspapers. We cannot think of a single day without reading a newspaper. It is too much favourite an item for us. There are various types of news in it. It carries news from all sides and of all topics of the world. Choosing columns of different topics depends on one's own mentality. So, while reading newspapers, someone opens the first page and another the last one. There are the writings of the remarkable writers in it. It bears daily information, tragic scenes, news of development activities, remarkable incidents, weather forecast, and so on. It is said that newspapers are the scale to understand the standard of a nation.

The biggest advantage of reading a newspaper is that it adds value to our life. It improves our English or any other language in which we are reading in it. It enhances our confidence. It actually makes lives easier as we are updated with the current information around us. It also increases our reading skills and indirectly writing skills as well.

Sometimes, many fabricated or false pieces of information are also published in newspapers. This is called yellow journalism that results in great problems in society. So, the authorities or writers must be conscious of the interests of the people. Otherwise, it might hamper national and international relations.

In developing international relations, newspapers act as a medium. They also offer various job advertisements. So, they are helpful in removing unemployment. The stories and novels published in newspapers give us much pleasure. So, considering all these, it can be said that reading newspapers is a must to cope with the changing world and be informed of current affairs.

17. Write a composition on 'Your Visit to a Place of Historical Interest'.

□

Ans. My Visit to a Place of Historical Interest
Bangladeshi culture is imbued with a mystic philosophy which is part of its heritage. There are quite a good number of places of historical importance in the region and Mahasthangarh is one of those sites carrying that philosophical essence. It is one of the earliest urban archaeological sites so far discovered in Bangladesh. It was a long cherished dream of mine that someday I would visit this place. Recently, I got a chance to visit this historical place which enriched my understanding of our heritage.

Mahasthangarh is thought to be dated back to at least the 3rd century BC. The village Mahasthan in Shibganjthana of Bogra District contains the remains of an ancient city which was called Pundranagara or Paundravardhanapura in the territory of Pundravardhana.

The main attraction of Mahasthangarh is Govinda Bhita, where I visited the remnants of two Buddhist temples. Opposite of Govinda Bhita, near the north side of the citadel is the Mahasthan Archaeological Museum. Though I found the museum quite small, it surely has a well-maintained collection of pieces recovered from the archaeological site discovered in the early 30's of the last century. The statues of

Hindu and Buddhist gods and goddesses, terracotta plaques depicting daily life, as well as some well-preserved bronze images found in nearby monastery ruins dating back to the pre-Pala period, are some of the relics found during the excavation. There are even some antiques used for rituals in the Mauryan period.

The overall experience of the visit has nourished my curiosity and my desire to revisit our roots. I feel proud of our age-old heritage, a history that uplifts our identity in the world.

18. Write a short composition on "Floods in Bangladesh".

Ans. Floods in Bangladesh

Floods are common in Bangladesh. They visit our country almost every year. We have big rivers in our country like the Padma, the Meghna, and the Jamuna. Heavy rains and river overflow cause floods. Sometimes, cyclones and high tides also lead to floods.

Floods affect both cities and villages. They damage homes, roads, and bridges. Crops get destroyed, and people lose their food and money. Many people have to leave their homes and live in shelters. Drinking water becomes dirty, and diseases like diarrhea spread easily.

The government and local people try to help during floods. They give food, clothes, and medicine to the affected people. Boats are used to rescue people from flooded areas. To stop floods, Bangladesh is building dams and embankments. Planting more trees can also help.

Floods bring many problems, but they also have some benefits. After the water goes away, the soil becomes more fertile. This helps farmers grow good crops. However, the problems of floods are much greater than the benefits.

We must work together to reduce the damage caused by floods. Better drainage systems and early warnings can save lives. Though floods are natural, careful planning can protect people and property.

Floods are part of life in our country. With proper steps, we can manage them and make life safer for everyone.

19. Write a composition on 'Population Problem in Bangladesh'. [3]

Ans. Population Problem in Bangladesh

Population is an asset to a country. But it becomes a problem for a country when the country fails to provide them with employment opportunity and the basic needs of life. Bangladesh is an overpopulated country. Her population is growing rapidly. As a result, population has now become a great problem for Bangladesh.

The present growth rate of population in Bangladesh is 1.37%. It has made the country a crowded land. If this present growth rate continues, the population of Bangladesh will be doubled soon. Thus, the growth of population is a challenge to our existence as a nation.

There are many causes of over population. Illiteracy is one of the main causes. Moreover, ignorance, early marriage, some social and religious

superstitions, unemployment of rural women, etc. are responsible for over population.

Population explosion is destroying all the efforts for our development. Our population is increasing, but the land is fixed. Other facilities for living are not increasing. So, the problems of shelter, food, clothing, medical treatment, housing, education, entertainment, etc. are increasing. It also causes various disturbances in the society. Because of it, everything becomes difficult. So, various socio-economic and political problems are being created for population explosion in Bangladesh.

We all must come forward to control our population. We should adopt family planning measures effectively. Each family must live in a planned way. No family should have more than two children. Early marriage must be banned. Mass education should be increased, as an educated person can realize the problem of over population. People should be made aware of the social and religious superstitions.

Over population has become one of the most serious concerns for our country. It must be checked as early as possible. All should come forward to solve the problem of over population.

20. Write a short composition on 'Unemployment Problem in Bangladesh'. [3]

Ans. Unemployment Problem in Bangladesh

When a man has a job or a work for his living, he is employed. And when he has no job, he is referred as unemployed. In a country, if there are more able people than the total number of jobs, there is an unemployment problem. Bangladesh is now seriously facing this problem.

Bangladesh is a developing country. In this situation, she has a large population in a small area. Regarding this, the birth rate of the country has previously been very high. Our population is increasing day by day. It is beyond her capacity to provide works to all of her people. At present, the population is about 160 millions. About 1100 people live in per square kilometre. After providing food, we cannot create scopes for job for the unemployed people.

It is very easy for any frustrated person to do devil's work. An unemployed person is generally either frustrated or an idle brain. Moreover, when they are not in any service, they hardly care anyone. There is a popular saying, "An idle brain is the devil's workshop." Nowadays, the social disorder is mainly caused by unemployment. Hence, it is a great curse in our country.

We can, however, change our condition by ourselves. The first thing that can be done is to control the high birth rate of our population. We all desire to work in cities. This tendency should be changed. We can engage ourselves in self-employment in our rural areas. In this context, the government should help the unemployed people with technical education and financial support. The government should increase facilities in the field of technology. Moreover, the guardians of the society can help their children most. They can help them with good advice and guidance.
